ENI MOMOREOLUWA JEWEL

I am a motivated and result-driven Software Engineer. My focus is on building and optimizing user-focused websites and apps for clients with diverse business objectives. With exceptional organizational, problem-solving, and communication skills, I thrive in collaborative environments where I can effectively contribute to project success. I am a highly adaptable learner, continuously improving my abilities and taking on new challenges one problem at a time.

September 2018- September 2021

PROJECTS

Fake authentication experience (Vue, Veu X)
vue js application using the cli then simulate a fake authentication experience
using vue x and vue router to include products using
https://dummyjson.com/products' API and nested routes for the navigation menu
that will show on each page, and authguards.
Authentication App

React Admin Dashboard Application (React, Tailwind, Synfusion)
React Admin Dashboard App With Theming, Tables, Charts, Calendar, Kanban,
and more using React Context API, syncfusion

Admin dashboard

User App - *(React, React-router, randomuser.me, framer motion)*
Developed a website utilizing React Router and sidebar navigation. Leveraged
React Router to create dynamic routing and navigation functionality, while
implementing a user-friendly sidebar for easy navigation.
Jewelivywebsite

Api fetch of GitHub Portfolio — *(React, CSS, SEO)*
Implemented an API fetch of my GitHub portfolio listing all repositories, SEO,
error boundary, and an Error 404 pageBuilt the logic for a streamlined ad-serving
platform that scaled
MyGithub-portfolio
